

# **AERO METALS ALLIANCE UK LIMITED**

## **APPENDIX 1 to Terms and Conditions of Sale**

### **EXPORT CONTROL STATEMENT**

The Seller fully understands the importance of export compliance and takes its responsibilities seriously. The success of the Seller relies heavily on a significant part of trading with international customers. Reviews are regularly undertaken of the internal/export processes and current export control legislation to ensure compliance.

Export control regulations are enforced in countries throughout the world to support national security policies and prevent the illegitimate development of weapons of mass destruction and related terrorist activities. Over the past few years the political and economic climate has sharpened the focus on export controls and as a consequence regulations are tightening and enforcement is increasing.

A strong stance has been taken therefore to understand the controls and ensure they are complied with fully.

All new and existing customers and suppliers are screened to ensure there is no trading with or supply to those in prohibited entities. All necessary licenses and other government approvals are obtained prior to exporting control listed products.

The purpose of the controls is to limit the supply of these goods to countries proscribed, principally for reasons of proliferation, security, or terrorism.

All recipients of the Supplier's goods are expected to comply with all applicable national and international (re-) export control regulations.

Compliance with the legislation is essential; failure to do so may have serious consequences and incur penalties for the Seller and for the individuals concerned.
